

We rely on XM Satellite radio for weather, traffic and wonderful music. We are traveling the US and count on being able to access the weather and traffic info from such a reliable source. We pay for this service as well as for their many other channels. We get a clear signal from them on every channel. That is not available from ANY other station or broadcaster! It would be unfair for the National Broadcasters to dictate what we are allowed to hear. PLEASE, reject the NAB's petition 04-160. Please support XM's ability to provide this great programming! Thank you.
